PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable, secure web applications using Laravel/PHP and the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in designing RESTful APIs, multi-tenant architectures, role-based access control, and payment gateway integrations (Stripe). Hands-on experience with TypeScript, AWS (S3, Lambda), Docker, Redis, and GitLab CI/CD pipelines within Agile/Scrum teams. Based in Jhelum, Pakistan; available immediately for on-site, hybrid, or remote roles across Pakistan.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, C#

Frontend: React.js, HTML5, CSS3, Blade

Backend: Laravel, Node.js, Express.js

Databases: MySQL, MongoDB

Cloud & DevOps: AWS (S3, Lambda), Docker, GitLab CI/CD, Vercel

Tools & Practices: Git, RESTful APIs, Agile/Scrum, Redis, Stripe, Socket.io, Pusher, Laravel Horizon

PROFESSIONAL EXPERIENCE

Laravel Developer — Rev9Solutions | On-site | Jul 2025 – May 2026

- Designed and developed scalable Laravel applications and RESTful APIs to support core business workflows.
- Implemented multi-tenant architecture with secure role-based access control to ensure proper data isolation across tenants.
- Optimized background job processing using Redis queues and Laravel Horizon, improving reliability of asynchronous tasks.
- Integrated the Stripe payment gateway and other third-party services to support secure online transactions.
- Applied TypeScript in project development to improve code reliability and maintainability.
- Configured and maintained GitLab CI/CD pipelines to automate build and deployment processes.
- Collaborated within an Agile/Scrum team, participating in sprint planning and code reviews to deliver iterative feature releases.

Full Stack Developer (MERN & Laravel) — Freelance | Remote | 2022 – Present

- Delivered full-stack web solutions for freelance clients, including RESTful APIs, admin dashboards, and payment integrations.
- Built and integrated a login/authentication module using the MERN stack (React.js, Node.js, Express.js, MongoDB), delivered within a single day to meet a client deadline.
- Deployed personal and client projects using Vercel; used AWS S3 and Lambda for cloud storage and serverless functionality in select projects.
- Containerized applications using Docker to maintain consistent development and deployment environments.

PROJECTS

E-Commerce Shop Module — Laravel, React.js, Stripe

- Built a Laravel backend and React.js frontend, including an admin dashboard and Stripe-based online payment processing.

API-Based Systems — Laravel, RESTful APIs, Blade

- Designed an API-only multi-tenant system and e-learning platform APIs, with Blade-based admin dashboards.

Greetings Chat Application — Laravel, Socket.io, Pusher

- Built a real-time messaging application with live notifications using Socket.io and Pusher.

PakLabor — Final Year Project — React.js, Node.js, Express.js, MongoDB

- Developed a full-stack MERN application connecting non-technical construction workers with job opportunities, including NLP-based worker profile ranking and RESTful APIs backed by MongoDB.

Market Management System — ASP.NET, C#

- Built a web-based management system with CRUD operations, billing and invoice printing, and database-driven reporting.

EDUCATION

BS Software Engineering — University of Gujrat, Gujrat, Pakistan | Nov 2021 – Jun 2025

ADDITIONAL INFORMATION

Open to on-site (Jhelum/Islamabad/Rawalpindi/Lahore), hybrid, or remote roles • Available immediately • GitHub: github.com/shahroz-tech
